

Chemistry Department

Summary of Information for Counseling Department

COURSE	LEAD INSTRUCTOR	Phone 558-	COMMENTS
CHEM 300	Marisa Alviar-Agnew	650-2950	-Check that students have already met the Math 100 prerequisite or recommend that they take the assessment test a few months prior to registration. Please check the latest version of the attached file (CHEM 300 FAQs) for additional information.
CHEM 305	Linda Nuss	2223	
CHEM 306	Bruce Zenner	2466	
CHEM 309	Dianne Bennett	2689	
CHEM 317	Linda Nuss	2223	
CHEM 330	Marisa Alviar-Agnew	650-2950	-Recommend this GE class to students who have already taken classes at any Los Rios college for at least one year so they are already familiar with D2L, computer lab and other learning resources on campus.
CHEM 336	Sue Roper	2214	
CHEM 400	Bill Miller	2229	-It is recommended that students take CHEM 300 (not CHEM 305) as preparation for CHEM 400 even if they have had high school chemistry (successful completion of AP CHEM would be an exception). CHEM 300 is geared for those students who will move on to CHEM 400. CHEM 305 does not provide enough of the problem solving practice or depth of topics needed for CHEM 400.

			<p>Please advise students against taking CHEM 305 as a means to prepare for CHEM 400.</p> <p>-Often the time commitment required for science major courses is a surprise to students. This is especially true for CHEM 400 as it is the first science-majors course for many students. Please help our students understand that there will be a heavy time commitment for General Chemistry classes and that making ample time in their schedules for studying, lab work, homework, etc. is critical for their success.</p> <p>Please check the latest version of the attached file (CHEM 400 FAQs) for additional information.</p>
CHEM 401	Maggie Flores	650-2737	
CHEM 420	Ling Huang/Dianne Bennett	650-2928/2689	
CHEM 421	Ling Huang/Dianne Bennett	650-2928/2689	
CHEM 425	Dena Chubbic	2610	<p>Pre-med, Pharmacy, Dentistry and Pre-vet Majors. The CHEM 425/426 series is modeled after the Chem 118A/B/C series at UC Davis, which is for students planning professional school studies in health (medicine) and life sciences (biology). Not for chemistry majors.</p>
CHEM 426	Dena Chubbic	2610	<p>Pre-med, Pharmacy, Dentistry and Pre-vet Majors. The CHEM 425/426 series is modeled after the Chem 118A/B/C series at UC Davis, which is for students planning professional school studies in health (medicine) and life sciences (biology). Not for chemistry majors.</p>
CHEM 499	Bill Miller	2229	<p>Prerequisite: successful completion of Chemistry 400 or instructor approval.</p>

SPECIAL NOTE:

1. The Chemistry Department offer three separate series of courses: non-majors, science majors, and allied health majors and it is NOT a good idea for students to try to hop between the different series.
2. Please help our students understand that there will be a heavy time commitment for chemistry classes and that making ample time in their schedules for studying, lab work, homework, etc. is critical for their success.
3. Additional time may be needed by students for regular tutoring.
