Issue/Concern: Faculty/Staff Parking

Describe the issue/concern::

Employees need reliable, predictable parking spaces when arriving on campus to do our jobs, at whatever time of day needed. Faculty (especially post-pandemic) teach from a variety of locations including the main campus, satellite campuses, and home, and often have little time to search for parking between classes; furthermore, parking is needed close to our classrooms/offices so that we can transport the often substantial teaching materials necessary, and so that faculty and staff have safe passage back to parking when teaching at night.

What do you recommend or suggest solving this issue/concern? :

Regarding students, the District is supporting them during these difficult years of the pandemic by providing free parking. The solution is to require staff parking passes to park in staff lots (as has always been required in the past), while not charging students for parking passes to park in other areas such as student lots and the parking garage. Students who park in staff lots perhaps could first receive a warning for non-compliance, then tickets would be issued. It's a win-win.

How will this recommendation support the success of SCC students and benefit the campus community?:

Regarding students, the District is supporting them during these difficult years of the pandemic by providing free parking. The solution is to require staff parking passes to park in staff lots (as has always been required in the past), while not charging students for parking passes to park in other areas such as student lots and the parking garage.
